

Secures stud and runner without screws or other fasteners

- Unique punch and die creates rectangular crimp, bending over thicknesses of channel and stud at the same time to form a strong bond.
- Compound handle leverage assures easy one-hand operation and allows user to hold stud and runner in place with the other hand
- Lightweight and compact size for easy working overhead or in tight places.
- Rust resistant materials.
- Non-slip vinyl grips with hand stops for added comfort.
- Throat depth : 38mm (1-1/2")
- Maximum (2) layers: 22 gauge (0.7mm)
