

CLIM NEWS 2021

Climatech wishes you ...

2020 is now behind us and we would like to **thank**, not only **our staff** who worked every day during these long months of doubts and fears always putting the priority on customer service but also **our partners** for their support and collaboration throughout the past year. We hope that like the entire Climatech team, you were able to get through it without too much trouble neither professionally nor privately.

2021, despite the current period of uncertainty, will be a year of **hope and renewal**. We would like to wish you a **Happy New Year**, filled with joy, success and above all **excellent health**.

As every year, the greeting card budget is entirely donated to various associations:

- **ESCALPADE**, a specialized school for children with motor disabilities.
- **HÔPI-CLOWN** aims to improve the child's stay in a hospital environment through fun & clownish activities.
- **CAP 48**, helps fund associations active in the disability sector and youth assistance.

We are pleased to give you below some news of our recent achievements.

We hope to see you soon

Climatech expands

To keep on providing an excellent service, Climatech has increased its factory by **50%**. The total surface is now 10 000m². This new space will not only allow the development of new production lines but also offer better warehousing capacity.

Climatech goes green:

For many years, we have made sure to minimize our environmental impact (LED lighting, paper tape, ...). Today we have decided to become even greener, taking advantage of our expansion, we have installed **1540 photovoltaic panels on our roofs**.

Our new website

In 2020, Climatech focused on improving its communication tools. Thus, a **new version** of our website was launched at the end of the year. This site, available in 4 languages, presents all our products with more details: description, technical data sheets, application videos, ... You can also consult the **history of our company** and its **latest news**.

In the meantime, we invite you to follow us on [LinkedIn](#) not to miss any news about our products.

Reorganization of our product families

The range of products offered by Climatech being constantly evolving, we have grouped them more clearly in 4 distinct categories:

1. Antivibration & Duct connectors	2. Insulation fasteners & Tools	3. Air distribution & Regulation	4. Duct access, Supports & Fixing
			
<p>Being Climatech's historic business since 1985, this group of products has been enhanced with antivibration mounts since 2010. Climatech is now the main manufacturer of the range of products needed to protect your ventilation units against vibrations.</p> <p>Features products :</p>	<p>By constantly innovating and continuously increasing its production capacity, Climatech has become the world leader in fasteners for insulation of ventilation ducts. We also have innovative solutions, especially in welding machine materials.</p> <p>Features products :</p>	<p>Climatech is constantly expanding its range of Air distribution products and has a wide choice to meet the different requirements specific to each country.</p> <p>Features products :</p>	<p>This is the most evolving profession within Climatech. With its partners mainly Belgian and European but also global, Climatech innovates and now offers many new solutions to its customers.</p> <p>Features products :</p>
<p>Rubber mounts</p>	<p>Cordless welding machine</p>	<p>Adjustable jet nozzle</p>	<p>Support system</p>
			
<p>Mounting clamps</p>	<p>Washers & caps</p>	<p>Aluminium cast louver</p>	<p>Rubber rails</p>
			
<p>Pre-formed circular connector</p>	<p>Lacing accessories</p>	<p>Acoustic steel air valves</p>	<p>Insulated access doors</p>
