

Description

The quick lock hose clamps **FBM**, **CBR** and **CLD** consists of continuous serrated banding with rounded edges. They are designed to secure flexible ducts to outlets, pipes and other fittings.

- The **CBR** fastening band allows to create a custom made fastening clamp. The band is supplied in a dispenser with markings for easy and efficient cuts at the appropriate length to achieve a desired diameter.
- The **CLD** locking device is specially designed to fit the CBR band. Thanks to its locking device with tilting housing and screw, it is easy to adjust at proper perimeter or length.
- The **FBM** is a perforated fastening clamp up to 660mm dia. It allows an easy and quick application. It is equipped with a CLD locking device securely welded on the band.

Specifications techniques

CBR - FASTENING BAND	
Material	Stainless steel 430
Length	Roll of 30 m
Width	9 mm
Thickness	0,6 mm

CLD - LOCKING DEVICE	
Frame set	Coated steel
Screw material	Coated steel
Screw head	Hexagonal, cruciform and slotted

FBM - PREFORMED BAND		
Banding	Material	Stainless steel 430
	Width	9 mm
	Thickness	0,6 mm
Locking device	Material	Coated steel
	Screw	Hexagonal, cruciform and slotted
Preformed band diameters	125, 150, 175, 225, 275, 350, 400, 550, 660
