STEEL FASTENERS FOR TURNING VANES

General description

Turning vanes are commonly used in airduct to improve airflow and efficiency. Fixing turning vanes is not always easy. Using Clim steel fasteners, turning vanes can be fixed quickly and securely in one operation. Made of steel, galvanized, they are very strong and their rubber «o» ring ensures the air tightness in the assembly.

Technical specifications

Application

1. Drill 9mm diameter hole as required
2. Position the vane inside of duct
3. Push the SFM-9 fastener through the hole to hold the vane and hammer the head to lock
4. The turning vanes are quickly and firmly fastened
