## General description

The RDR regulators are easily installed inside ducts for ventilation or airconditionning, whether it is used for supply or exhaust purposes. RDR dampers assure a constant airflow volume within a pressure range of 50 up to 200 Pa . For higher pressure, we refer to our RDR-HP. Thanks to an easy setting mode (with screw), you can set different airflow levels (see table).

## Technical description

- Made of fire retardant plastic, classified M1
- Color: black
- Stainless steel calibrated spring
- Rubber sealing for airtightness
- Maximum temperature: $60^{\circ} \mathrm{C}$
- Airflow levels marked for easy setting

## Dimensions

|  | A(mm) | $\mathbf{B}(\mathbf{m m})$ | $\mathbf{C}(\mathbf{m m})$ |
| :---: | :---: | :---: | :---: |
| RDR 80 | 76 | 76 | 57 |
| RDR 100 | 96 | 93 | 68 |

|  | A (mm) | B (mm) | L (mm) |
| :---: | :---: | :---: | :---: |
| RDR 125 | 120 | 117 | 86 |
| RDR 150 | 148 | 148 | 85 |
| RDR 160 | 148 | 148 | 85 |
| RDR 200 | 190 | 195 | 91 |
| RDR 250 | 244 | 245 | 120 |

## Applications

- To be inserted inside round ducts, for horizontal and vertical mounting
- To be mounted according to the airflow direction and BAS/DOWN marking
- By air supply: to be placed at a minimum distance of $3 x$ the duct diameter from airsupply grills and at the same distance close to areas with high turbulence like duct connection, bends,..
- By air exhaust: to be placed at a minimum distance of $1 x$ the duct diameter from airsupply grilles and at the same distance close to areas with high turbulence like duct connection, bends,..

T-7094 _ RDR

Technical specification

| RDR | Setting | Flow ( $\mathrm{m}^{3} / \mathrm{h}$ ) | Set flow ( $\mathrm{m}^{3} / \mathrm{h}$ ) |
